COVID-19 Antigen Nasal Test Kit – Self Test Instruction Guide
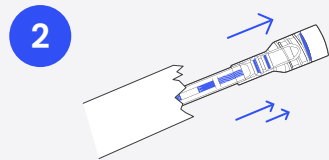

To watch a demonstration video, visit **https://www.pathdx.com.au/nasalpenhometest**. Freecall us on **1800 728 439** (9am to 7pm AEST).

Package contents:

Base **Protector** **Nasal Collector**

**Positive** or **Negative** **Invalid** or
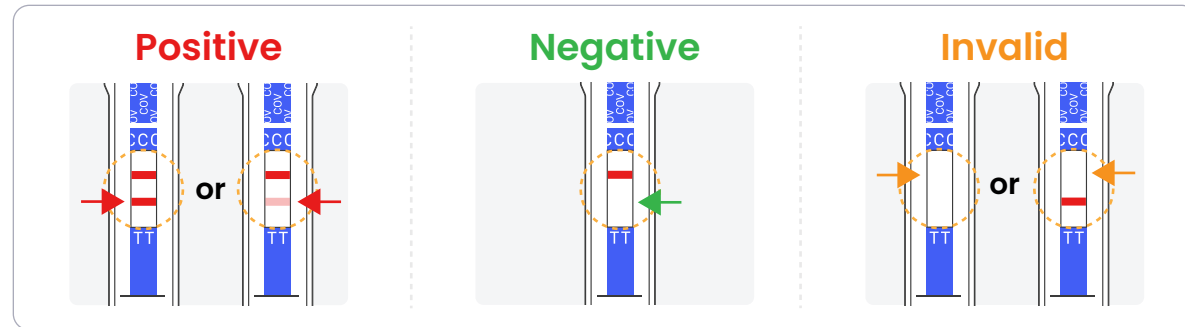

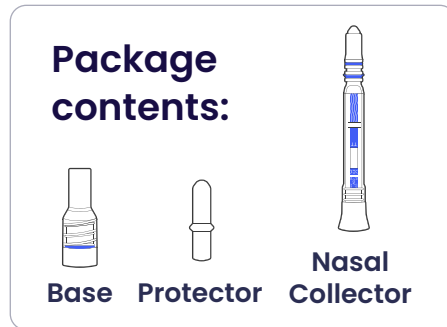

Note: Use test only one time. Test within first 7 days of symptoms. Testing by adult or under adult supervision only.
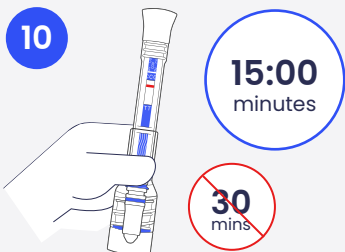

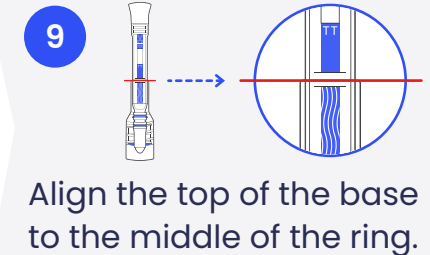

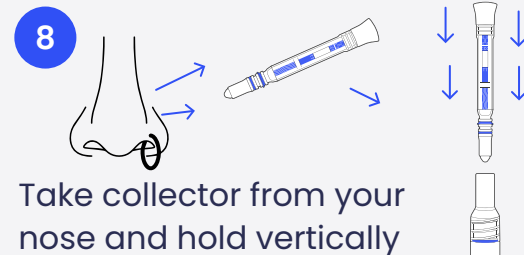

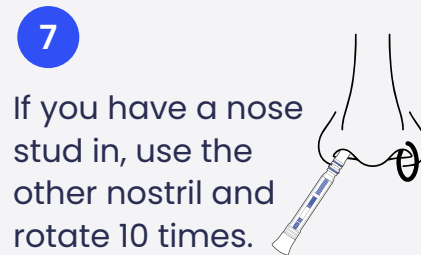

1 Wash your hands before the test.

2 Remove the test from the packaging.

3 Take the nasal collector out of the base.

4 Remove the protector from tip.

5 Rotate the collector five times against the nasal wall in left nostril

6 and then repeat in the right nostril.

7 If you have a nose stud in, use the other nostril and rotate 10 times.

8 Take collector from your nose and hold vertically

9 Align the top of the base to the middle of the ring.
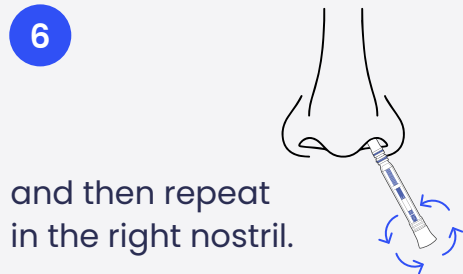

10 **15:00** minutes **30** mins Wait 15 minutes, then check your results. **Results will be invalid after 30 minutes.**

11 Compare your results with the images shown above. A **Positive** result shows both a control line **and** test line. **A faint test line should be considered positive.** Take a PCR laboratory test (regular COVID-19 test) **immediately** and contact your health provider. **No control line** means **Invalid** - push the collector into base & re-test. Call us for advice.

12 Place kit into plastic disposal bag and dispose of according to your local regulations.
